DOCUMENT REVIEW and APPROVAL FORM (DRAF)

Section I - REQUEST		DRAF No. 040	
Request for:	☒ Creation	☐ Revision	☐ Disposition/Deletion
Document Type:	☒ Form/Template	☐ QMS Manual	☐ PAWIM
	☐ Planning Documents (SWOT, Risk Registry, Opportunity Registry, Relevant Interested Parties, OPCR)		
	☐ Operations Manual (Title Page, Introduction, Terms and Acronyms, Legal Bases, Forms/Templates)		
	☐ Quality Control Plan		
Applicability:	☐ CO	☐ RO	☐ SDO
	☐ School		
Document Title:	Preventive Maintenance Checklist		
Document Reference Code:	OSQS - 02 - 107 - 02	Current Revision Number:	0
Reason for the request:			

The **Preventive Maintenance Checklist** is designed to ensure the consistent and systematic inspection, cleaning, and optimization of desktop and laptop computers within the organization. Its primary purpose is to:

- Identify and resolve potential issues early to prevent system failures and minimize downtime.
- Maintain optimal performance of hardware and software components.
- Ensure security and reliability of network settings and antivirus protection.
- Extend the lifespan of IT equipment through regular cleaning and hardware checks.
- Support operational continuity by verifying the functionality of essential peripherals and installed applications.

Rationale

The **Preventive Maintenance Checklist** serves as a structured and standardized tool to ensure the consistent upkeep of desktop and laptop units within the organization. Its primary purpose is to proactively identify and address potential issues before they escalate into system failures or operational disruptions.

This checklist is designed to support the following objectives:

1. **Ensure System Reliability and Performance**
By regularly inspecting hardware and software components, we reduce the risk of unexpected breakdowns and maintain optimal system performance.
2. **Enhance Security and Network Integrity**
Verifying firewall settings, antivirus status, and network configurations helps safeguard systems against cyber threats and ensures secure connectivity across the organization.
3. **Extend Equipment Lifespan**
Routine cleaning and hardware checks prevent physical degradation, overheating, and wear, thereby prolonging the usable life of IT assets.
4. **Support Operational Efficiency**
Ensuring that all required software and peripherals are functional minimizes downtime and supports uninterrupted workflow for users.
5. **Maintain Compliance and Documentation**
The checklist provides a documented record of maintenance activities, which is essential for audits, asset management, and accountability.

By implementing this annual preventive maintenance protocol, the IT department reinforces its commitment to delivering reliable, secure, and efficient technology services to all users. The checklist is completed by the Information Technology Officer and conformed by the respective user, ensuring transparency and shared responsibility in maintaining IT resources.

Prepared by:

JOSE MARI M. APILAN
Information Technology Officer

Approved by:

MA. LIZA R. TABILON, EdD, CESO V
Schools Division Superintendent

PREVENTIVE MAINTENANCE CHECKLIST

Title	Desktop/Laptop Maintenance	Frequency:	Annually			
PC Model:		Serial No.				
User Name:		Section:				
Signature:		Date:				
Item#	Task	Description	Good Condition	Needs Repair	Required	N/A
1.	System Boot	• Boot System from a cold start, monitors for errors and speed of entire booting process				
2.	Network Setting	• Verify the following • Security Firewall settings • TCP/IP Address and Internet connectivity • Shared Printer				
3.	Internet Browsers	• Verify proper settings and operations				
4.	Computer Hardware Settings	• Verify Device Manager settings • BIOS up to date • Hardisk Drive (HDD) condition • DVD or CRW drive condition • Memory (RAM) condition • For Laptop, Battery run-time norm.				
5.	Software installed	• Required software is installed and operational				
6.	Utility Software Installed	• Anti-virus installed • Anti-virus up to date • Scanning for cleaning viruses				
7.	Disk Clean-up	• Unused software removed • Temporary files removed • Recycle bin and caches cleaned • Defragment of files				
8.	Interiors, and Cleaning	• Dust Removed • No loose parts • Airflow • Cables and Connectors • CPU Fan
